District Overview 11

The information presented in this document is an analysis/summary of data provided to the Evaluation, Testing, and Data Management Unit of the State Department of Education by other organizations. While the Evaluation, Testing, and Data Management Unit monitors incoming data for completeness, the extent to which conclusions and generalizations can be drawn is dependent on the accuracy of the information provided by the responsible organization.

INTRODUCTION

The Constitution of New Mexico provides for an elected and appointed State Board of Education to establish educational policy for elementary and secondary schools. The State Board appoints a superintendent of public instruction who serves as the chief administrative officer of the State Department of Education. Personnel within the Department of Education serve as staff to the State Board and are assigned monitoring, technical assistance, and policy development functions. Our public schools are organized into 88 independent school districts, each governed by a locally elected board of education. Within requirements established by state law and policy, our local school districts: establish budgets; employ staff; set local educational goals, strategies, and curriculum; implement programs; and evaluate the operation and performance of their schools.

The purpose of the New Mexico School District Profile is to provide a broad range of educational indicators, data which serve to describe the operation and performance of our school districts. The Profile was first published for the 1970-71 school year and has been produced in essentially the same form for the past five years.

The Profile contains three major sections. Section I provides a summary overview of statewide data. Section II contains a detailed listing of each variable used in this year's Profile along with a definition and source citation. Section III contains data for each of New Mexico's 88 school districts for the past four years. The data for each district are presented on each page and a statewide data page is placed on the overleaf of the front cover. This arrangement was selected to facilitate referencing district and state performance.

It is not the purpose of this publication to compare one district's "excellence" with another, either directly or by implication. These data will not tell how "good" or "bad" a district's program is, nor can any major generalizations be made about all districts from this information. The school districts of New Mexico are very diverse in community makeup and resources which can have a major impact on the data presented herein. The data should be used as indicators only and must be used in conjunction with a wider range of information sources before arriving at any judgements concerning the quality of education in a particular district or group of districts.

SECTION I

STATEWIDE OVERVIEW

In this report we provide a series of educational indicators, data which describe the operation and performance of New Mexico's public schools over the past three years. These indicators have been selected to provide as broad a picture of our schools as possible given many practical limitations. The statewide summary data which appear on the overleaf have been organized into a series of tables which provide data on the operation and performance of our schools along the following dimensions: Student Enrollment, Pupil/Teacher Ratios, Licensed Staff, Dropouts, Vocational Education, and Secondary Students. These broad indicators are used, with supplementary data, in this section of the Profile, to provide a statewide overview. Section II of this report contains data definitions and source citations and Section III contains these data for each school district.

The number of students enrolled in our public schools has increased and the nature and needs of this population are quite diverse. Statewide student enrollment levels for the past ten school years are presented in Figure 1. While our schools have experienced a decline in enrollment since 1971, the 1982-83 school year saw a reverse in this trend. An inspection of the enrollment figures presented on the statewide Summary page reveals that kindergarten enrollments have continued to increase from the 1981-82 school year low of 18,650 students to 23,421 students in the 1987-88 school year. We anticipate statewide enrollment will continue to increase over the next several years. During the 1987-88 school year, enrollments among our districts ranged from a low of 79 students to a high of 82,416.

Figure 2 illustrates the percentage of New Mexico students attending school by locale. The definitions used by the Bureau of the Census is as follows: Central ~~City has~~ a population of over 400,000, Urban Fringe is an area contiguous to a central city, City has a population of over 25,000, Small Town has a population of over 2,500, and Rural is an area with a population of less than 2,500. In 1987 the only locale classified as a Central City was Albuquerque. Therefore, 28% of the total public school population attends school in that city.

Usually forgotten when thinking of student populations, Figure 3 shows the membership for the Accredited Private, the Recognized Private, and the State-Supported Schools. In 1975 the State Supreme Court ruled that private schools did not have to be accredited to operate in New Mexico. Since then, the number of students attending recognized schools increased rapidly until the 1984-85 school year. In 1987-88 the total school age population for Public, Private, and State-Supported Schools was 312,048.

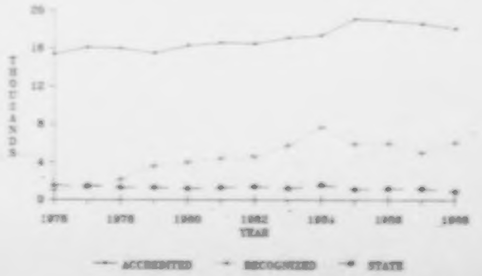
Fig 3

PRIVATE AND STATE-SUPPORTED SCHOOL
MEMBERSHIP 1976-77 THROUGH 1988-89



The ethnic composition of our seventh through twelfth grade students is graphically illustrated in Figure 4. For the 1987-88 school year, 44.9% of our students were Anglo, 41.7% were Hispanic, 10.2% were Native American, and 3.2% were of other ethnic origins. U. S. Bureau of Census information indicates that 4% of our age five through seventeen population has limited English proficiency. Our state and federal bilingual education programs are designed to meet these special needs. New Mexico was the first state to formally implement such programs.

Figure 5 illustrates the ethnic composition by different grade categories. In the seventh and eighth grades, 42.7% of our students were Anglo, 44.0% were Hispanic, 10.1% were Native American, and 3.2% were of other ethnic origins. However, in grades nine through twelve, 46.1% of the students were Anglo, 40.5% were Hispanic, 10.9% were Native American, and 2.5% were of other ethnic origins.

Vocational Education programs equip students with employment related skills and experience necessary for life. The data presented provide information on the amount of skill and exploratory classes available to students.

Fig. 4:

ETHNIC COMPOSITION OF SECONDARY STUDENT BODY - SCHOOL YEAR 1987-88

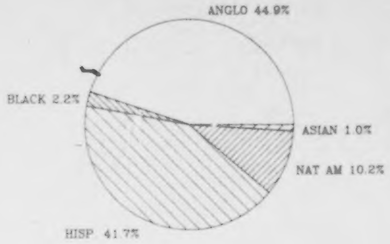


Fig. 5:

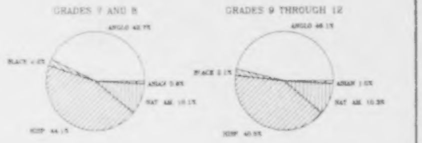
ETHNIC COMPOSITION OF STUDENT BODY
SCHOOL YEAR 1987-88

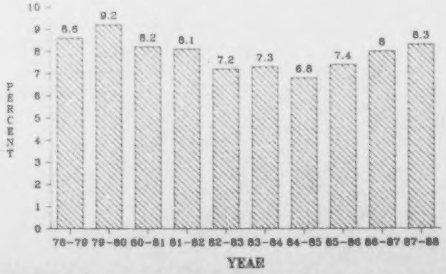


GRADES 7 AND 8

GRADES 9 THROUGH 12

Fig. 6:

DROPOUT RATE BY YEAR
GRADES 9 THROUGH 12



One Indicator of improved educational performance is the school's ability to reduce the percent of students who drop out of school each year. This "dropout rate" represents the percent of grade 9 through 12 students who discontinue their formal education prematurely each year. Statewide dropout rates for the past ten years are illustrated in Figure 6.

The number of students taught by each teacher has traditionally been accepted as one indicator of resources being made available in the teaching/learning process. Information addressing this matter is provided under the table labeled "Pupil/Teacher Ratio." Although the Educational Standards for New Mexico Public Schools (1987) defines grade grouping, in the tables the ratios are given by grades because of the recent interest in school reform. The grade groupings are presented graphically in Figure 7.

Since secondary school teachers teach many different students each day, teacher loads per day are used to describe the average number of secondary school students taught by these teachers. This information for the past three years is presented graphically in Figure 8 for both mid/junior high schools and for senior high schools. Since high school enrollments have been declining over the past several years, the noticeable increase in teacher loads per day at this level may be due, in part, to shifting resources in an effort to meet increasing needs at the early elementary school grade levels. Issues of shifting existing resources and/or providing additional resources in anticipation of further increases in enrollments are currently under discussion by all concerned with the topics of pupil/teacher ratios, teacher loads, and with issues related to future teacher supply and demand.

Fig. 7:

PUPIL/TEACHER RATIO BY GRADE AND YEAR

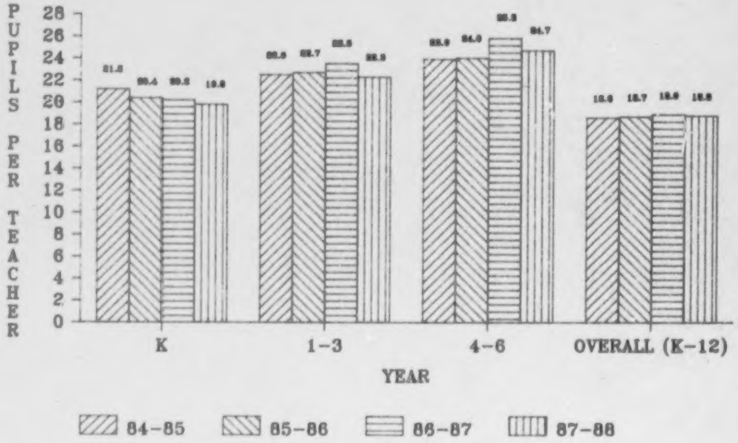


Fig. 8:

TEACHER LOAD PER DAY MID/JR. AND HIGH SCHOOLS

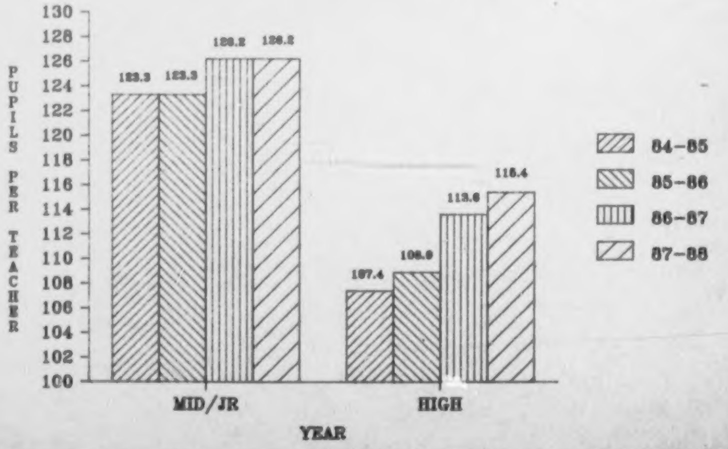

Figure 9 shows the number of teachers since 1981. As would be expected, the number of teachers has increased to keep up with the rise in the number of students. However, while the number of students has increased by 9% since 1981, the number of teachers has only increased 6.2% in the same time period.

Our schools employ a wide variety of educationally licensed staff. For descriptive purposes, the licensed staff can be divided into three groups by function: direct instruction (teachers assigned to instruct students), instructional support (librarians, counselors, etc.), and administrators (superintendents, business managers, personnel directors, etc.). During the 1987-88 school year, 85.3% of our licensed staff served direct instructional functions, 13.2% served instructional support functions, and 1.5% served administrative functions. These data are graphically illustrated in Figure 10.

The ethnic composition of the teaching staff is graphically illustrated in Figure 11. For school year 1987-88, 72.7% of the teachers were Anglo, 24.0% were Hispanic, 1.5% were Native American, 1.2% were Black, and .5% were Asian/Pacific Islander.

SECTION II

DEFINITIONS AND SOURCE CITATIONS

This section of the Profile contains definitions and source citations for all of the educational indicators (data) which appear in this report. These definitions and source citations are arranged by major table headings. For example, definitions and source citations for data which appear in the table titled "Student Enrollment" are presented together under the outline heading "Student Enrollment." The definitions which are provided, are written to reflect how the data were treated to produce "district level" results. State level results were produced using essentially the same process and the same data.

I. Student Enrollment

A. Number of Students - K, 1-3, 4-6, 7-9, 10-12, (Sp. Ed. (C, D, C Level Gifted), and Total. These data reflect the actual student enrollment as of the 40th day of school.
Source: School Finance (40-Day Membership by Grade by School)

B. Number of Students - Chapter I. This value is the number of students that receive services under Chapter I.
Source: Chapter I Office

C. Number of Students - Bilingual Education. This value is the number of students receiving services from federal or state operated Bilingual Education programs.
Source: School Finance (40-Day Membership Report)

D. Percent Primary Grade Repeaters. This value is the percent of students in grades 1, 2, and 3 that are repeating a grade. The value is derived by dividing the total number of repeaters in each grade by the total 40-day membership in that grade.
Source: Evaluation Unit District Survey Data
School Finance (40-Day Membership by Grade by School)

E. Mobility Rate. This value is the percent of the student body moving into or out of the school district each year. The method used to calculate this value is to add all students who enter the district after having been previously enrolled in another district or state to the number of students who withdrew during the year, subtract those who subsequently returned, and divide the results by the 180th day membership.
Source: Evaluation Unit District Survey Data
School Finance (40-Day Membership Report)

F. Net Expenditure per Pupil. This value is the Net Operational Expenditures and are defined as the expenditures for: Direct Instruction, Instructional Support, Administration, Operation of Plant, Maintenance of Plant, and Fixed Charges.
Source: School Finance "New Mexico Public School Finance Statistics"

II. Secondary Student Body

A. Student Body - Percent Anglo, Asian, Black, Hispanic, and Native American. This represents the primary makeup of the student body in grades 7 through 12 for 1987-88 and grades 9 through 12 for the previous years. Each ethnic percent is derived by dividing the number of students in each ethnic category by the 180-day membership in each grade.
Source: Evaluation Unit District Survey Data

B. High School Graduates by Ethnicity. This represents the ethnic makeup of the high school graduates. Each percent was derived by dividing the number of graduates in each ethnic category by the total number of graduates.
Source: Evaluation Unit District Survey Data

C. Total Graduates. This value is the number of students who received a diploma during the school year and at the end of the previous summer school session.
Source: Evaluation Unit School Survey Data

D. Percent Planning College. This represents the number of graduates that indicated they were planning some type of post-secondary education. The value is derived by dividing the number planning by the total number of graduates.
Source: Evaluation Unit District Survey Data

E. Vocational Classes as a Percent of all Classes - Skills. This value represents the number of student class hours offered in Vocational Education (Voc. Ed.) skill development classes expressed as a percent of the total number of student class hours offered for all classes. This value is derived by summing the number of Voc. Ed. skill development student class hours offered and dividing by the sum of the number of all student class hours offered. These data are calculated for all mid/junior and high school class offerings except Special Education.
Source: Personnel Report Form (SDE 810)

F. Voc. Classes as a Percent of all Classes - Exploratory. This value represents the number of student class hours offered in Voc. Ed. exploratory classes expressed as a percent of the total number of student class hours offered for all classes. This value is derived by summing the number of Voc. Ed. exploratory student class hours offered and dividing by the sum of the number of all student class hours offered. These data are calculated for all mid/junior and high school class offerings except Special Education.
Source: Personnel Report Form (SDE 810)

G. Voc. Class Hours Available per Student - Skills. This value represents the number of hours of Voc. Ed. skill classes available to each student enrolled in the district. It is derived by dividing the number of Voc. Ed. skill class hours in the district. For each district, the enrollment (6-12, 7-12, etc.) is determined by the grade at which Voc. Ed. classes are first offered.
Source: Personnel Report Form (SDE 810)
School Finance (40-Day Membership Report)

H. Voc. Class Hours Available per Student - Exploratory. This value represents the number of hours of Voc. Ed. exploratory clases available to each student enrolled in the district. It is derived by dividing the number of Voc. Ed. exploratory class hours offered in the district by the number of students enrolled in the district. For each district, the enrollment (6-12, 7-12, etc.) is determined by the grade at which Voc. Ed. classes are first offered.
Source: Personnel Report Form (SDE 810)
School Finance (40-Day Membership Report)

III. Dropouts

A. Dropout Rates. This value is the percent of students in each grade category that dropped out of school each year. This value is derived by dividing the total number of dropouts in the district by the number of dropouts plus the number of students on roll on the 180th day of school.
Source: Evaluation Unit District Survey Data

B. Percent of Dropouts by Ethnicity. This represents the primary ethnic makeup of the students that dropped out of school each year. Each ethnic percent is derived by dividing the number of dropouts in each ethnic category by the number of dropouts plus the number of students on roll on the 180th day of school.
Source: Evaluation Unit District Survey Data

IV. Pupil/Teacher Ratio

A. Pupil/Teacher Ratio for Grade K. This value represents the average number of kindergarten students taught by each teacher. This ratio is derived by dividing the total number of kindergarten students by the total number of FTE kindergarten teachers in the district.
Source: Personnel Report Form (SDE 810)

B. Pupil/Teacher Ratio for Grades 1-3. This value represents the average number of grade 1-3 students taught by each teacher in these grades. This ratio is derived by dividing the total number of students assigned in grades 1-3 by the number of FTE teachers assigned to teach in these grades.
Source: Personnel Report Form (SDE 810)

C. Pupil/Teacher Ratio for Grades 4-6. This value represents the average number of grade 4-6 students taught by each teacher in these grades. This ratio is derived by dividing the total number of students assigned in grades 4-6 by the number of FTE teachers assigned to teach in these grades.
Source: Personnel Report Form (SDE 810)

D. Teacher Load/Day - Mid/Junior. This value represents the average number of students taught by mid/junior high school teachers in the district each day. This value is derived by dividing the total number of students assigned to mid/junior high school classes in the district each day by the total number of FTE teachers assigned to teach these classes. These data do not include classes such as band, music, physical education, or special education.
Source: Personnel Report Form (SDE 810)

E. Teacher Load/Day - High. This value represents the average number of students taught by high school teachers in the district each day. This value is derived by dividing the total number of students assigned to high school classes each day by the total number of FTE teachers assigned to teach these classes. These data do not include classes such as band, music, physical education, or special education.
Source: Personnel Report Form (SDE 810)

F. Overall P/T Ratio. This value represents the districtwide ratio of pupils to teachers regardless of grade or type of teaching assignment. This ratio is derived by dividing the total student enrollment in grades K-12, including special education students, by the total number of FTE teachers.
Source: Personnel Report Form (SDE 810)

V. Licensed Staff

A. Total Teachers in FTE. This value represents the total number of full-time equivalent teachers employed by the district.
Source: Personnel Report (SDE 810)

B. Teaching Staff Percent Anglo, Asian/Pacific Islander, Black, Hispanic, and Native American. These values reflect the primary ethnic makeup of the teaching staff. These values are derived by dividing the number of teachers in each ethnic category by the total number of teachers in the district. In most cases these values do not add to 100 percent due to missing values.
Source: Personnel Report (SDE 810)

C. Teaching Staff % MA Plus. This value is the percent of teaching staff who possess a Master's or higher degree (Ed. Specialist, Ed.D., Ph.D.). This value is derived by dividing the number of teachers who have been reported as possessing a Master's degree or above by the total number of teachers employed.
Source: Personnel Report (SDE 810)

D. Teaching Staff - Years of Experience. This value is the average number of years of teaching experience for all teachers in the district. This figure is derived by dividing the total years teaching experience (in-state or out-of-state) by the total number of teachers.
Source: Personnel Report (SDE 810)

E. Average Teacher's Salary. This value is the average salary for all teachers in the district, which includes teachers paid with federal funds. This figure is derived by dividing the total salary (base pay plus extra pay) by the total teachers in full-time equivalents.
Source: Personnel Report (SDE 810)

F. Training and Experience Index. This value is derived by multiplying the number of "Instructional Staff," in full-time equivalency, by a factor determined by the Legislature for each different category of experience plus training.
Source: School Finance

G. Percent of Total Staff in Administration. This value is the percent of total licensed staff serving as Administrators (Superintendents, Assistant Superintendents, Pupil Personnel, etc.). This figure is derived by dividing the total administrators by total staff in each school district.
Source: School Personnel Report (SDE 810)

H. Percent of Total Staff Supporting Instruction. This value is percent of total licensed staff that in some way support the learning process, i.e., Librarians, Guidance Counselors, Principals, etc. This figure is derived by dividing the total administrators by total staff in each school district.
Source: School Personnel Report (SDE 810)
